

## First Aid Heartsaver® First Aid Online With CPR & AED Part 1\*

Nearly 80 percent of cardiac arrests occur outside the hospital. And in recent years, OSHA reports that approximately 4 million workplace injuries and illnesses occurred annually. Providing training that enables employees to take appropriate rescuer action at the workplace is an essential element of an effective safety program.

The Heartsaver® First Aid Online With CPR & AED Part 1 Course is for businesses and other entities that want to provide first-time or renewal first aid, CPR and AED training to their employees or designated first responders. This course presents the cognitive portion online (Part 1) and offers a blended learning solution for organizations that face obstacles implementing classroom-based training. To help students gain confidence in performing skills, Part 1 is combined with a hands-on skills session (Part 2) where students have one-on-one time with an AHA Instructor to practice skills. A skills test (Part 3) with an AHA Instructor ensures skills proficiency. Upon successful completion of all three parts students receive their course completion card.

### Features

Interactive questions and video segments

Downloadable student review guide

Part 1 certificate of completion is provided and must be presented at a skills practice session (Part 2) and a skills test (Part 3) conducted with an AHA Instructor

Can start, stop and return to online modules as needed

Product #80-1461

### Benefits

Convenient alternative to traditional classroom training

Offers fast implementation with no classroom scheduling delays

Self-paced learning for Part 1

Flexibility to complete online modules at home or work

Content based on the latest American Heart Association science

Allows for one-on-one practice with an AHA Instructor to ensure competence in skill performance

### Course Covers:

- First aid basics
- Medical emergencies
- Injury emergencies
- Environmental emergencies
- CPR
- AED use
